

# Improve school facilities with Prop 39: The Clean Energy Jobs Act

Sustainable Improvements. Guaranteed Results.

A young girl with dark curly hair is shown in profile, looking upwards and to the left. She is wearing a light blue shirt. The background is a blurred classroom setting with a green chalkboard and colorful posters.

[ New legislation offers rare funding opportunity ]

## \$2.5 billion

By closing a tax loophole, the measure is projected to generate \$2.5 billion to be used in funding clean-energy and energy efficiency projects in public buildings like yours.

School districts now have access to a new, significant funding source for facility upgrades, thanks to the recent passing of California Proposition 39. By closing a tax loophole, the measure is projected to generate \$2.5 billion to fund clean-energy and energy-efficiency projects in public buildings. That means you can finally do the work your facilities have been needing for years.

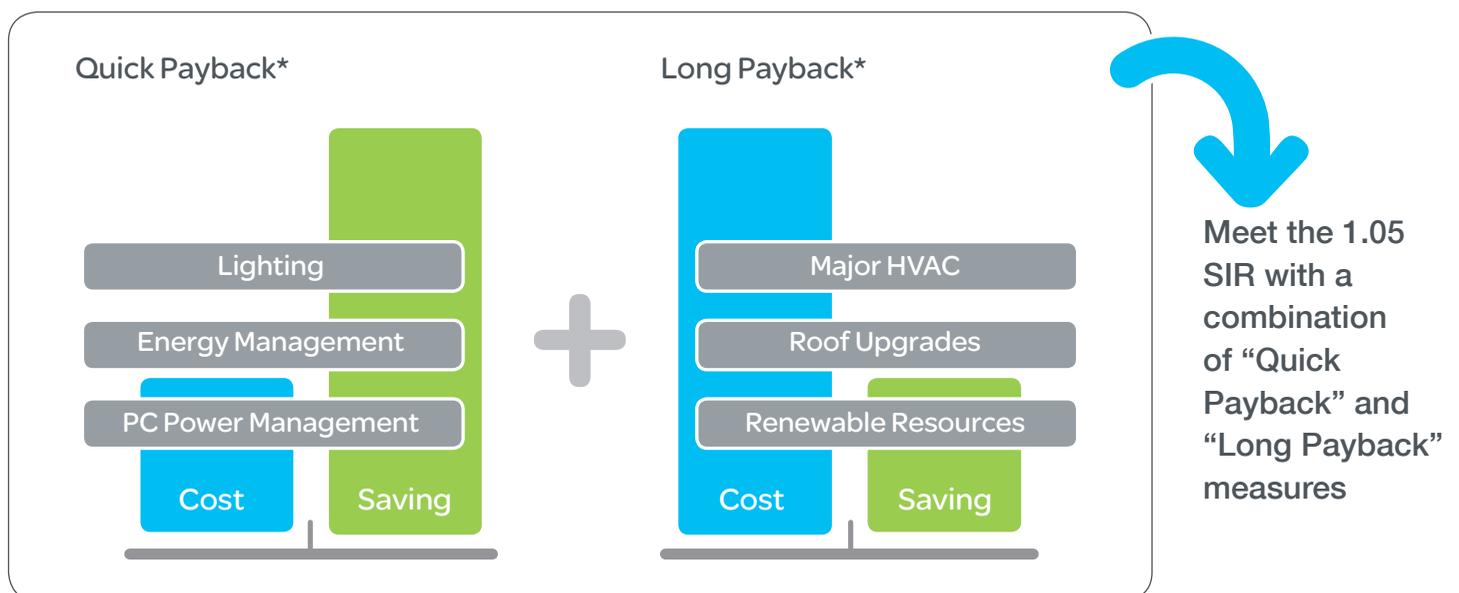

### We make funding go further

Schneider Electric has a long history and proven expertise in helping organizations like yours secure all the funding available to them. We will partner closely with you and handle the details of obtaining your Prop 39 funds — and much more. We seek out additional grants, rebates and incentives to maximize all funding sources available and help you create a plan that maximizes every dollar. We can help you communicate the plan to your stakeholders. Then we execute your project efficiently, utilizing local contractors and laborers. It's time to stop patching problems in your facilities and fix those critical issues once and for all.

### Energy saving projects - guaranteed

With our flexible financing options and performance guarantees, you can leverage new revenue streams to fund additional capital improvements over a set period of time. Our industry experts use the latest energy-saving practices and technologies to upgrade aging equipment, reduce maintenance expenses, lower utility bills, and improve building performance — often reducing energy costs by up to 30 percent. And it's risk-free. In the unlikely event you don't achieve the guaranteed savings, Schneider Electric will pay the difference.

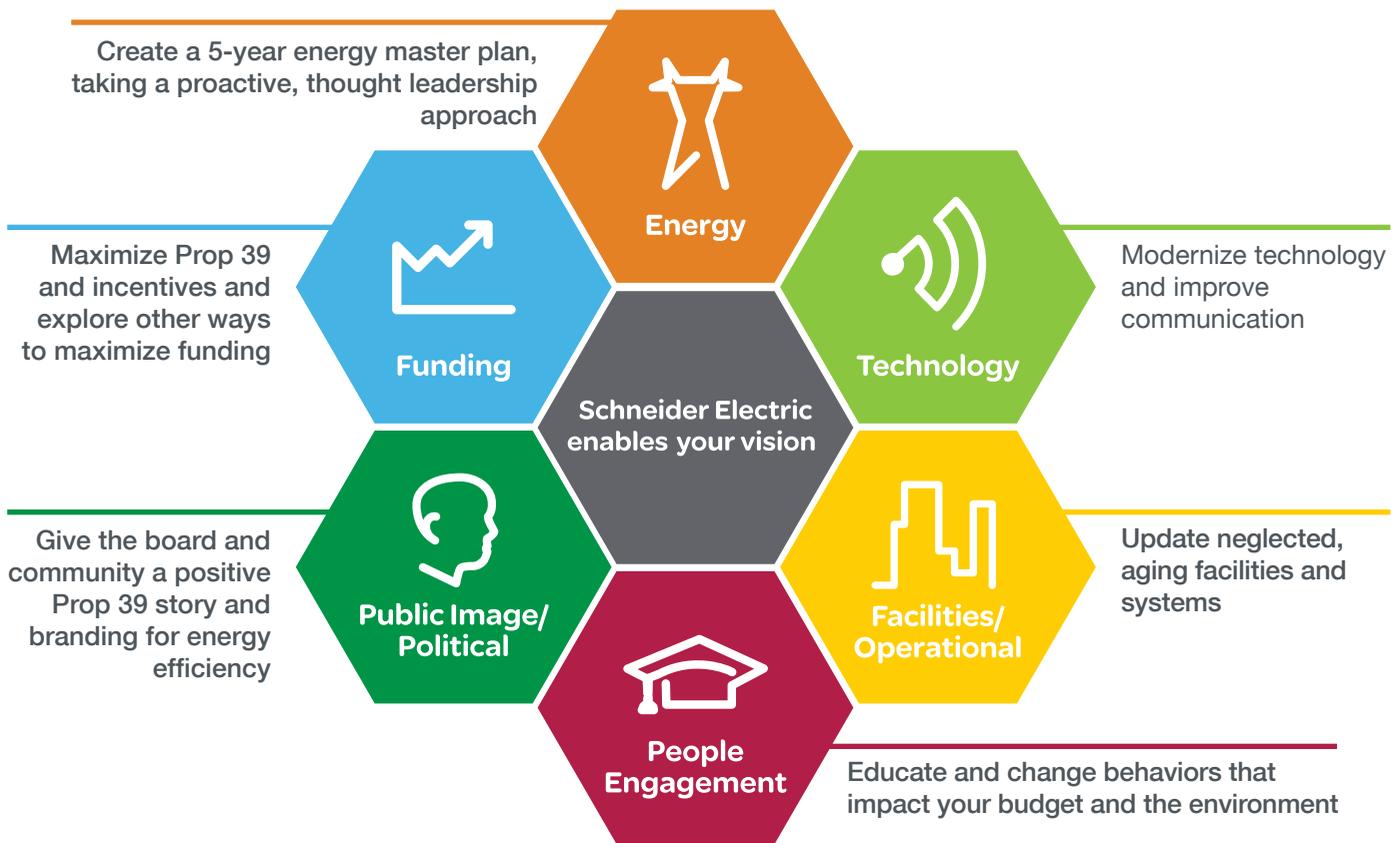

### What can be included?

\* These are just examples, and other energy conservation measures and revenue generating measures may be included as either a quick or long paybacks.

Imagine if you could have everything you want for your district.

Our capabilities can enable your ultimate vision.

### Energy
